

Filter Clean

Filter Clean is an all-purpose granular filter cleaner with 100% active acids and detergents for removing mineral deposits and oil buildup from cartridge, D.E. and sand filters. **Filter Clean** features unique color-change technology to show its working!

Features:

- For sand, cartridge and D.E. filters
- Removes scale and mineral deposits
- Dissolves grease and grime
- Increases filter efficiency

Applications:

Directions for use with sand or non-removable elements:

1. Backwash filter, leaving handle in backwash position.
2. Turn pump off.
3. Remove hair and lint trap cover and drain filter.
4. Turn pump on.
5. While pump is running, pour **Filter Clean** into hair and lint trap until enough solution has been added to cover the sand or non-removable elements in the filter tank.
6. Turn pump off.
7. Allow **Filter Clean** solution to soak for 12 to 18 hours.
8. With the filter in the backwash position, turn pump on and backwash until water coming from the backwash line is clear.
9. Start normal filter operation. Do not allow the solution to enter the pool.

Directions for use on filters with removable elements:

1. Turn pump off and drain filter tank.
2. Soak filter elements for 12 hours in Filter Clean solution.
3. Remove elements from solution, rinse thoroughly and let dry.
4. Replace dry elements into filter and begin normal filter operation.

Sizes:

2 lbs.

Tips:

Use **Filter Clean** at the end of the swimming season, when the water flow through the filter seems impaired and when the backwash frequency increases.

Compatible With:

Chlorine, bromine, salt water, minerals, ozone and biguanide
