

The Pristiva® Advanced System for Salt Water Pools

The Pristiva system is the most advanced start-up and maintenance program for salt water pools available, providing unparalleled protection and water performance. The system itself consists of two products – Pristiva Primer® and Pristiva Activator™.

The Perfect Solution for a Perfect Salt Water Pool

Whether you're considering building a pool, thinking about switching over your traditional chlorine pool, or seeking better care for your existing salt water pool, the Pristiva System is the perfect solution. After conducting extensive research with pool builders, retailers and service companies to understand the unique needs and challenges of salt water pools, we designed an entirely new program to not only meet, but exceed, those needs. The result is the fast, easy Pristiva System.

- Advanced system for start-up and maintenance of salt water pools, consisting of Primer and Activator.
- Combines pristine salt and Pristiva Primer for crystal clear, smooth water that is more comfortable than traditional chlorine or salt water pools.
- Provides unmatched protection of pool finishes and equipment.
- Easy to use with fewer steps for less time and lower cost associated with operating and maintaining a pool.
- Replaces all conventional pool salts for salt water pools.

The Pristiva System delivers breakthrough technology in both Primer and Activator for incomparable salt water pool comfort and protection.

Step 1: Pristiva Primer

- Primes the pool for immediate protection as the first step in the start-up or conversion process to a Pristiva Perfect Pool.

Step 2: Pristiva Activator

- Completes the second step and final stage of the start-up or conversion process to a Pristiva Perfect Pool.
- Establishes salinity levels and delivers the full balance of enhancers needed to activate the total benefits of the Pristiva Perfect Pool.
- Maintains pool salinity levels throughout the pool season.
- Delivers crystal clear, soft, soothing waters unmatched by traditional salt water pools and traditional chlorine pools

Pristiva (A Backyard Brands Company) 401 S. Enterprise Blvd., Lebanon, IN 46052 USA

The Pristiva System Application and Dosage

The Pristiva System replaces all other salts and blended mineral salts and can be used in all pools.

Filling newly built pool, refilling existing pool, or converting a traditional chlorine pool

- One bottle of Primer per 12,000 gallon
- One bag of Activator per 1,500 gallons

Conversion of an existing salt water pool to a Pristiva Perfect Pool

- One bottle of Primer per 6,000 gallons
- Using Activator, follow your electrolytic chlorine generator (ECG) manufacturer's recommendations for salinity levels

Seasonal opening and closing your pool

- One bottle of Primer per 12,000 gallons
- Using Activator, follow your ECG manufacturer's recommendations for salinity levels

Maintenance of your salt water pool

- Primer should be added every 3 months, as long as the pool is open
- Using Activator, follow your ECG manufacturer's recommendations for salinity levels
