

Filter Blaster

Designed for the busy pool professional, Filter Blaster cleans cartridge and D.E. filters in only 5 minutes. When you don't have time to soak, this spray-and-rinse formula removes scale, grime, grease and other filter-clogging debris fast.

Features:

- Easy-to-use spray formula
- Removes grime with powerful detergents & mild acids
- Removes rust, oils and other filter clogging debris.

Applications:

Normal:

Remove cartridge or D.E. filter from housing. Rinse off any loose material and completely saturate the filter with water. Spray **Filter Blaster** over the entire filter surface area. Allow to soak for 5 minutes and rinse clean with garden hose.

Heavily soiled filters may require a second application. If possible, let cartridge filters dry before reinstalling. This allows the fibrous material to "fluff" allowing filter to capture material most effectively.

Sizes:

32 oz. with trigger spray

Tips:

Always start out the season with a clean filter. Use **Filter Blaster** during the season to keep your filter working a peak efficiency. Maintaining your filter will reduce chemical consumption and result in consistently cleaner, clearer water throughout the season. **Filter Blaster** is safer to use than muriatic acid.

Compatible With:

Chlorine, bromine, ozone and biguanide sanitizers.

Advantage:

Effectively and economically removes grease, oil and mineral scale deposits and dirt from filter elements in just five minutes.
