

Staintrine

This fast-acting formula does double-duty. It removes existing metal stains and sequesters metals in the water to prevent new stains from forming. Metal stains and scale are quickly removed or lightened from pool walls while equipment is protected with professional-strength chelating agents. Swimming can resume immediately after treatment.

Features:

- Quickly removes most stains
- Professional strength formula
 - Prevents colored water
- Prevents scale buildup on filters, pumps and piping.
 - No testing is required.

Applications:

Removal of stains and scale:

Apply 16 oz. of **Staintrine** per 10,000 gallons of pool water capacity as close to the affected area as possible.

Sizes:

32 oz.

Tips:

Follow **Staintrine** treatment with weekly doses of **Resist™** stain control to prevent metals and minerals from staining pool surfaces.

Compatible With:

Chlorine, bromine, biguanide and salt water sanitizing systems.

Advantage:

No waiting - swim immediately.
