

Algimycin™ 600 algaecide

This non-foaming triple-action 60% polymer algaecide destroys and prevents the regrowth of green algae and increases water clarity all in one step.

Features:

- Fast and effective treatment for green algae
 - Contains no metals
 - Non-foaming
- Does not irritate swimmers
- Will not harm liners

Applications:

Initial Dosage to Prevent Algae:

Add 9 oz. per 10,000 gallons. Dilute **Algimycin™ 600** algaecide with at least nine parts water before applying. Pour required amount into a plastic water can and fill with water. Maintaining constant pool circulation, sprinkle solution around edge of pool.

Maintenance Dosage (weekly):

Add 3 oz. per 10,000 gallons. Dilute **Algimycin™ 600** algaecide with at least nine parts water before applying. Pour required amount into a plastic water can and fill with water. Maintaining constant pool circulation, sprinkle solution around edge of pool.

To Treat Existing Green Algae:

Add 16 oz. per 10,000 gallons. Pools containing heavy algae growth should be cleaned prior to using **Algimycin™ 600** algaecide. 24 hours after treating visible algae growth, visible algae debris should be removed by standard cleaning procedures. Dilute **Algimycin™ 600** algaecide with at least nine parts water before applying. Pour required amount into a plastic water can and fill with water. Maintaining constant pool circulation, sprinkle solution around edge of pool.

Sizes:

32 oz.

Tips:

It is easier to prevent algae growth than to destroy established algae. To be most effective against existing algae, add on a warm, sunny day in the morning. Remove dead settled algae by vacuuming. Please also refer to actual product label for complete directions and precautionary statements.

Compatible With:

Chlorine, bromine, ozone, salt water pools and biguanide sanitizers.

Advantage:

Wipes out green algae. Clears water with a filter aid that removes dead and living algae fast.
