

**Directions for use:**

**PHOSfree Commercial Strength**

1. Clean or backwash filter
2. Apply appropriate dose. See chart below
3. Shake bottle. With circulation pump running, add dose to skimmer
4. Clouding may occur. After 48 hours vacuum to filter

***Dosage Chart***

Phosphate Level	Dosage	Per Gallons
1000ppb	1/2L	10,000 gallons
2000ppb	1L	10,000 gallons
1000ppb	1L	20,000 gallons
2000ppb	2L	20,000 gallons

- Do not add more than 1.5L (50oz or half a bottle) at a time
- To treat higher phosphate levels, add 1.5L (50oz or half a bottle) every 24 hours until desired results are obtained

**Note:** Retest water after each completed treatment. Repeat until phosphate level is below 100ppb.

**Important:** Algae must be treated prior to testing or lowering phosphates. Chlorine must be under 5ppm before testing phosphates.
